SUMMARY

Software development engineer with 5+ years of web development, the last 2.5 building production ERP and POS systems for a national electronics distributor. Ships complete products solo, from database design and Node.js APIs to React UIs, Docker images and deployment on self-managed Linux VPS servers. Built a streaming AI data assistant used inside the company ERP, and uses AI-assisted development daily to deliver faster without lowering code quality.

SKILLS

Languages	JavaScript (ES2022+), TypeScript, SQL, HTML/CSS
Frontend	React, Next.js, React Query, Redux Toolkit, react-hook-form, MUI, Ant Design, Tailwind CSS, Vite, Webpack, i18next
Backend & data	Node.js, Fastify, REST APIs, PostgreSQL, Prisma, MongoDB, webhooks
AI	Claude API, Claude Code, agentic orchestration, subagents, MCP, context engineering, LLM streaming (SSE) UIs
DevOps	Docker, nginx, Linux VPS, Cloudflare, GitLab CI/CD, Git
Quality	Jest, ESLint, Prettier, lint-staged, code review, Feature-Sliced Design

AI ENGINEERING

Ships production code with AI agents daily and builds AI features into products. Uses **agentic orchestration**, where an orchestrator plans each task and hands it to specialised **subagents** for reasoning, implementation and code review, running them in parallel. Applies **model routing** to balance quality and cost, **context engineering** with repo-level coverage, and **spec-driven development**. Keeps AI output safe with **guardrails**: least-privilege agents, plan approval, and tests plus code review before every merge. On the product side, builds **streaming LLM interfaces**, data agents over live databases, and **Claude API** and **MCP** integrations.

EXPERIENCE

Software Developer (Frontend) — BM Electronics, Tashkent — May 2024 – Present

Build and maintain the company's internal platforms: **BMEL ERP** (my.bmel.uz), the Daftar operations and POS apps, and the corporate site bme.uz. Stack: React 18, React Query, react-hook-form, MUI DataGrid, i18next, Webpack.

- **AI data assistant:** built the ERP's AI chat end to end, streaming answers from live company data over **SSE**, with inline charts, chat history and permission-based access, covered by unit and integration tests.
- **Finance and accounting:** fixed assets, ledger, Balance Sheet and Trial Balance reports, period closing, currency exchange and payments.
- **Inventory, sales and delivery:** IMEI and serial tracking, inventory lots, stock transfers, orders, returns, product labelling and bulk Excel import.
- **Performance and UX:** server-side pagination, debounced search, URL-synced filters, code splitting, and React Query caching with optimistic updates.
- **Best practices:** reusable hooks and components, role-based access, internationalization, automated linting, unit and integration testing, and staged releases.
- **Corporate site:** built bme.uz with React, Tailwind CSS and GSAP, deployed with Docker.

Freelance Web Developer — Self-employed — Sep 2022 – May 2024

- Delivered end-to-end web projects for clients: UI, API integration and deployment
- Worked across the stack with React/Next.js on the frontend and Node.js + MongoDB on the backend
- Owned client communication: requirements, estimates and production-ready delivery

Frontend Web Developer — Software Systems, Tashkent Apr 2021 – May 2022

- Built and maintained user-facing features in React from designs and product specs (intern, then part-time)
- Implemented responsive layouts and integrated them with backend services; took part in code reviews

PROJECTS

QQL — Qishloq Qurilish Loyiha · qqlmonitoring.uz

Construction project management ERP · React, TypeScript, Ant Design, Redux Toolkit, React Query, Vite

- Designed the template-based database schema, separating template and project layers with admin-managed statuses
- Integrated Hikvision face-recognition terminals via ISAPI: real-time attendance webhooks plus scheduled device polling
- Built budget tracking, invoice processing and trilingual report generation on a Feature-Sliced Design architecture
- Added a Claude-powered report-analysis assistant with a streaming chat widget

Taklifly · taklifly.uz

Animated online wedding invitations shared as a link · Next.js 15, PostgreSQL, Prisma, nginx

- Built solo end to end, launching in Uzbek, Russian and English; self-hosted on a Hetzner VPS

EDUCATION

Bachelor's degree, Software Engineering

Tashkent University of Information Technologies (TUIT) · 2019 – 2023 · GPA 4.59 / 5

Two-time winner, TUIT Zakovat Club Championship; Vice President of Community Engagement, University Youth Union

LANGUAGES

Uzbek (native) · English (upper-intermediate, IELTS 6.5, 2023) · Russian (conversational)

INTERESTS

Algorithms & DSA: regular practice on LeetCode
Sports: chess, ping-pong and padel
